

AL AMEEN PRIVATE SCHOOL

Grade 4 ISFO Math topper from Al Ameen Private School.

It gives us immense pride and pleasure to announce that Moiz Al Anwar of Grade 4 has topped in the UAE for Maths Grade 4, at the ISFO Olympiad 2016.

Each year ISFO International Mathematics Olympiad is held to judge a certain group of students, of different nationalities, on an increasingly difficult application of mathematics.

Moiz Al Anwar has been awarded a free return ticket to Singapore, to participate in the Singapore and Asian Schools Math Olympiad (SASMO).

The ISFO Mathematics Olympiad is not just a test of a student's understanding of mathematics; it also aims to test the approach to tackle a problem, the clarity of thought and most importantly a student's response to the ever rising difficulty and their determination in solving the problems.

We congratulate our math whiz and wish him all the best for the international competition.
