

Career Search Assessment Seminar

Career Search Assessments prove very effective in establishing the student's strengths and identifying appropriate university programs (matching the student's strengths with appropriate university programs). This Assessment examines 3 key areas:

- Motivation
- Aptitude
- Personality

The Year 8 students along with their parents attended an informative session to receive guidance on the assessment feedback. Both parents and students found the session beneficial and will review the feedback before making subject selections during the Options Week 2012.
