

## *Healthy Teeth*

We at AAPS ensure that students' personal, social and emotional development is a priority. Keeping this in mind, a 'Poster Competition' was held at Al-Ameen Pvt. School on 19-Oct-11, where students of year 3 prepared posters on dental hygiene. Good dental hygiene habits begin even before the child's first tooth comes in. The students were divided into groups to prepare posters on the topic. A few students also worked individually and prepared special booklets. A power point presentation was also delivered by a student to the class on the importance of dental hygiene and its pivotal role in maintaining a healthy lifestyle. The cross curricular links encompassing Science, ICT & Art were addressed in the competition.

Orthodontics specialist Ms. Fatima Bapai came to address the students on dental hygiene matters so that the children could develop understanding of the concepts.
